DATA AUTOMATION

TECHNOLOGY

Automated data delivered to you in real time and at your fingertips. Leverage our suite of tools to package and visualise the information you need quickly and simply.

YOUR CHALLENGE

- In order to thrive, organisations must navigate a cultural shift from data-resistant to data-guided to, ultimately, data-led.
- However, many organisations do not know where or how to begin this journey and find themselves taking decisions not based on evidence.

OUR SOLUTION

- Through our one-stop analytic and research stack, we put data in your pocket – enabling data-led decisions and data-guided discussions.
- We offer a mobile-first experience for fast, intuitive, and dynamic access to data any time, anywhere.

WHY BLACKBOX

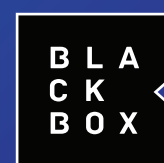

Blackbox builds end-to-end technology platforms for your key programmes and data sets, prioritising user experience, accessibility, and speed so your time is spent making informed decisions.

AI DIALOGUE

TECHNOLOGY

Automated data delivered to you in real time and at your fingertips. Leverage our suite of tools to package and visualise the information you need quickly and simply.

YOUR CHALLENGE

- Dashboards & PowerPoint reports have democratised data analysis, but they are limited by the linearity in which they retrieve and present information.
- Decision-makers need holistic view of their data, not just parts, to make their story effective.

OUR SOLUTION

- Our AI-powered dialogue automation tool is designed to answer your daily data needs.
- We provide a human-like experience that helps you tell stories and take action on-demand.

WHY BLACKBOX

Blackbox has spearheaded an innovative approach to on-demand data, with an AI-powered dialogue automation tool that is fast, intuitive, and acts as a one-stop data integration platform for data from different sources.

VISUAL DESIGN

TECHNOLOGY

Automated data delivered to you in real time and at your fingertips. Leverage our suite of tools to package and visualise the information you need quickly and simply.

YOUR CHALLENGE

- Organisations need to be able to explore and extract data quickly, no matter the purpose, but data tends to be siloed and segmented within organisations.
- Overhauling entire data-ing systems is not easy, and convincing people to use new tools or adopt new methods is just as hard.

OUR SOLUTION

- Our interactive data platform elevates dashboards to a new level of performance and visualisation, providing access to data across your business in an intuitive manner.
- Device-agnostic and fully compatible with mobile applications, it transforms data into visualisations, making complex datasets more engaging and intelligible.

WHY BLACKBOX

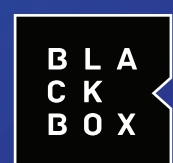

Blackbox provides user-friendly tools for everyone within an organisation – not just data experts. Where needed, we design long-term, personalised, end-to-end support frameworks.
